Rick,  
Becky will be updating her database with the latest from DNR. I will be in Anchorage tomorrow to work with her on this and the Pebble footprint. We will let you know what we come up with.

Here is the permit information for Big Chunk exploration in 2005. I think I sent you the Humble exploration permits yesterday. Becky will you be able to zoom in on the maps of Big Chunk to show the local streams and wetlands too if they are mapped. It looks like much of BC is in the Chulitna drainage but area A and some others are in the Kuktoli. We have more detailed maps for Humble already thanks to Mike W. and TNC.

Rick,

The last activity I can find any record of is some aerial geophysical work they did in 2009 (a permit is not required from DNR Mining) and DNR permitted activity in 2005.
